CISCO 9300 SERIES SWITCH AIR DUCT

DCS 3U airflow ducts are designed for 1U switches to contain hot or cold air paths to and from switches that are mounted into deeper cabinets. This keeps hot exhaust air from entering the switch and causes components to overheat or even shut down. Brush seals on the side and bottom give access to cabling.

PRODUCT SPECIFICATIONS

Product Type
Air Duct

Product Series
Passive Airflow Management

Features & Benefits

• Mounts in 19-inch Rack

• RoHS Compliant

• Aluminum Construction

Dimensions

Configuration	Height	Width	Depth
3U	5.22"	19.00"	9.125"

Colors
Black
ECO/Silver
(Other Colors Available Upon Request)

Available Configurations

Item Number	Configuration	Color*
753-0103-001	3U	Black
753-0103-002	3U	ECO/Silver

*Other Colors Available Upon Request
